School Spotlight

River Grove School, MN

Student Testimonial: "The standing table helps me concentrate better & now I can get my work done easier" - 5th grade student

Greatest Benefit : Due to the movement support the products are providing our students, they are able to focus in class with less support from teachers as well as being able to follow through and finish assignments in a timely manner.

Would your school, using our WittFitt products, like to be highlighted in our next newsletter? [Contact Us!](#)

Product Spotlight

WittFitt Essential Package

Our Essentials Assortment is designed to allow teachers and their students [of all levels] to experience dynamic furniture without initially committing to specific products. Implementing this package, with guidance from the WittFitt Team, is the perfect way schools to decide which pieces deliver the best results in their classrooms to make future purchases simple.

*Education/training from the WittFitt Team included.

\$\$ Funding Tips \$\$

Parent Rental Program

Perfect for teachers wanting to purchase for the first time or for those wanting to add more/replace products.

How it works: A small amount of money is collected from parents to keep the classroom supplied with active furniture. Similar to music instrument rentals for example.

Teachers would collect a small amount of money.

\$5-10 from 25 kids = \$125-\$250.

This money could then buy... for example: 2 hokki stools, 8 seating discs or 5-6 stability balls.

What does the research say?

Active Brain

Inactive Brain

Bad posture does more than hurt your neck and spine. It negatively affects the frontal lobe, which is responsible for key tasks like problem solving and memory.

Good posture fires your frontal lobe so you can work at your best & your mood will even be improved!

Our WittFitt products encourage better posture and movement that all nourish the BRAIN. What could be more important for students?
